My family and I have been involved with Rocky Mountain horses now for many years. They are loved and treasured not only by my husband and myself, but by our children, and now by our grandchildren. I never imagined how much Rocky Mountain Horses would come to shape our lives in such a blessed way. . .

As a young adult, once I graduated from Wolfe County High School, I married Robert, and began working as a payroll clerk in a manufacturing firm. Our girls came along a few years later. Surprisingly, I began college at 30 seeking an educational degree. It was after I went back to school that our girls got their first horse. She changed our lives! We all grew up loving and riding Pepper. Robert trained and we showed our Rockies . . . then he moved on to helping others.

My degree in hand from ECU, I began teaching in 1991. I got my Master's and Rank I. All the while our family worked together and played together with our horses. I retired from teaching in 2016 but I continue to work with our horses, grandkids, and the RMHA.

Over the twenty-five years, I have served the Association in many ways. I am the past president of the Rocky Mountain Drill Team and served in that capacity for eight years. We traveled to eight states promoting the RMH. Our farm has been used for youth, judging, and training clinics. I have also been a member of the RMHA Nominating Committee, Show Advisory Committee, and the International Show Committee multiple years. I have been the interim Treasurer and am a current Hearing Panel member.

As a continuing member of the Board, I will encourage developing educational resources to enhance the knowledge base of members through technology and by other means. Increasing communication, providing access to information, and maintaining high ethical standards will continue to be a focal point. Developing and supporting trail, versatility, and show programs will be a priority as will encouraging additional income streams. As a Hearing Panel member, my decisions will be based on the Rules and By-Laws of the RMHA. Controversies will be settled fairly by including all stake-holders in an unbiased manner. Thank you for your support in the past, and thank you for your consideration once again.
